INDEX—AUTHOR AND SUBJECT

Page

A collaborative study of the Blish-Sandstedt, Schoorl, and Bertrand methods for determining reducing sugars in flour diastatic activity measurements. C. F. Davis... 74
A comparative study of various methods of measuring flour gassing power. W. J. Eva, W. F. Geddes, and B. Frisell... 458
A comparison of several methods for the determination of the neutralizing value of monocalcium phosphate. S. Klosky, K. H. Lorenz, and W. Corey... 687
A comparison of 1X, 2XX, and 4XXXX tin pans in experimental baking. D. F. Worley and C. F. Davis... 769
A molder for micro-baking. W. V. Van Scoyk... 263
A preliminary study of the physical significance of certain properties measured by the Chopin Extensimeter for testing flour doughs. G. W. Scott Blair and Pierre Potel... 257
A study of gluten protein fractionation from sodium salicylate solution. I. Durum wheat gluten fractionation. R. H. Harris... 695
A study of some physical properties of flour doughs in relation to their bread-making qualities. P. Halton and G. W. Scott Blair... 201
Acetic acid, effect of, on the growth of certain molds. George W. Kirby, Lawrence Atkin, and Charles N. Frey... 867
Acidity
  Development of, during the storage of flour. E. A. Fisher, P. Halton, and R. H. Carter... 142
  Effect of specific types of, on mold growth in bread. George W. Kirby, Lawrence Atkin, and Charles N. Frey... 867
Action of wheat amylases on raw wheat starch. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 605
Agronomist's view of wheat quality. P. C. Mangelsdorf... 97
Aitken, T. R., M. H. Fisher, and W. F. Geddes. The effect on loaf volume, of proving doughs to a definite height as compared with for a fixed time... 233
  and W. F. Geddes. The comparative quality of flours from corresponding wheats milled on an Allis-Chalmers experimental mill and a Brabender automatic laboratory mill... 511
Alcohol, effect of, on the preparation of wheat amylases. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 328
Amino acids
  Distribution of, in whole wheat and white flour, bran, and shorts. Frank A. Csonka... 398, 399
  Effect of conditions of storage on the development of, in flour. E. A. Fisher, P. Halton, and R. H. Carter... 150
  Location of, in various parts of the wheat kernel. D. Breese Jones... 774, 775
  in staple foods. II. The effect of milling wheat on the distribution of amino acids. Frank A. Csonka... 397
Ammonium sulfate, precipitation of amylases with. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 611, 615
Amylase, alpha
  as an activator affecting the rate of starch conversion in wheat flour. R. M. Sandstedt, M. J. Blish, D. K. Mecham, and C. E. Bode... 26
  Comparison with raw starch amylase. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 621
  Effect on Farinograph readings. Emil Munz and C. H. Bailey... 454, 455
  Effect on physical properties of doughs. Eldor Rupp and C. H. Bailey... 509
  Estimation of the activity of. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 622, 623
  Inactivation of, by acidulation. Emil Munz and C. H. Bailey... 453
  See also R. M. Sandstedt, M. J. Blish, D. K. Mecham, and C. E. Bode... 26
  Preparation of. Emil Munz and C. H. Bailey... 453
Amylase, beta
  Effect on Farinograph readings. Emil Munz and C. H. Bailey... 454, 455
  Effect on the baking quality of flour. Emil Munz and C. H. Bailey... 450
  Presence of, in wheat flour. R. M. Sandstedt, M. J. Blish, D. K. Mecham, and C. E. Bode... 24
Amylase fractions
  Activity of, on boiled starch, erythrogranulose, soluble starch, and raw starch. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 617, 618
  Comparative activities of. M. J. Blish, R. M. Sandstedt, and D. K. Mecham... 620
Amylase, purified, relative saccharogenic indices of. J. W. Read and L. W. Haas... 64

Page

Amylases
Effect of temperature on their separation from wheat flour. M. J. Blish, R. M. Sandstedt, and D. K. Mecham 328
Effect on the baking quality of flour. J. W. Read and L. W. Haas 67
Effect on the physical properties of dough. Emil Munz and C. H. Bailey 450
Fractional precipitation of, from raw starch with ammonium sulfate. M. J. Blish, R. M. Sandstedt, and D. K. Mecham 615
Inactivation of, by alcohol 329
Occurrence of, in raw wheat starch 606
Precipitation of, from raw starch by alcohol 624
Precipitation of, from raw starch by ammonium sulfate 611, 615
Presence of, in wheat flour. R. M. Sandstedt, M. J. Blish, D. K. Mecham, and C. E. Bode 18, 24
Amylolytic agents
Effect of, on the baking quality of flour. J. W. Read and L. W. Haas 66, 67
Relative proteolytic activity of. J. W. Read and L. W. Haas 65
An explanation of the effect of heat treatment on wheat germ. B. Sullivan, Marjorie Howe, and Frederick Schmalz 489
An investigation into the cause of the degrading effect of wheat germ on the baking quality of flour. Joan E. Bull 244
Anderson, J. A., and W. O. S. Meredith. Some observations on the study of varietal differences in the malting quality of barley 879
and Henry R. Sallans. Sources of error in the determination of the diastatic power of malt 708
Apparatus
Allis-Chalmers mill, efficiency of. W. F. Geddes and T. R. Aitken 511
Brabender automatic laboratory mill, efficiency of. W. F. Geddes and T. R. Aitken 511
Chopin Extensimeter. Use of, in studying certain physical properties of doughs. G. W. Scott Blair and Pierre Potel 257
Dough Extensimeter. P. Halton and G. W. Scott Blair 207
Experimental mixer for processing alimentary pastes. C. C. Fifield, Glenn S. Smith, and J. F. Hayes 667, 668
for measurement of oxygen absorption by flour. P. Halton and E. A. Fisher 276
for study of effect of gases on dough properties. J. C. Baker and M. D. Mize 722
Molder for micro-baking. W. V. VanScoyk 263
Ash content
of cereal products. Methods for determination of. L. H. Bailey 120
of flour. Correlation with diastatic activity. L. E. Leatherock, H. W. McGhee, and J. W. Giertz 170
Asparagine, present in water extract of wheat germ. Joan E. Bull 251
Atkin, Lawrence, George W. Kirby, and Charles N. Frey. Further studies on the growth of bread molds as influenced by acidity 865
Bailey, C. H.
Book review. The Biochemistry of the Lipids, by H. B. Bull 441
Report of the Executive Committee 594
and L. J. Bohn. Effect of fermentation, certain dough ingredients, and proteases upon the physical properties of flour doughs 335
and R. H. Harris. The thermal fractions of gluten proteins and their relationship to baking strength 182
and Emil Munz. Effect of the enzymes of malted wheat flour upon certain properties of flour and dough 445
and Emil Munz. Refractometric methods of determining diastatic activity of flour 85
and Eldor Rupp. The effects of protease increments on the plasticity of doughs 496
and Oscar Skovholt. The effect of milk solids on fermentation reactions 108
Bailey-Johnson procedure for measuring gassing power of flour, accuracy of. W. J. Eva, W. F. Geddes, and B. Frisell 462
Bailey, L. H. Some observations on methods of ashing cereal products 120
Baker, J. C., and M. D. Mize. Mixing doughs in vacuum and in the presence of various gases 721
Baking pans
Effect of dough weight on the experimental loaf when proofing to constant height. C. F. Davis 45
Comparison of certain types of, for experimental baking purposes. D. F. Worley and C. F. Davis 769
Effect of size and shape of, on character of experimental loaves. C. F. Davis 37
Size of, for experimental baking 35
Use of high and low form 38, 39, 42, 43, 44
Baking quality, flour
as influenced by storage conditions of the flour. P. Halton and E. A. Fisher 287
Effect of alpha- and beta-amylase on. Emil Munz and C. H. Bailey 456

Effect on the development of bacteria, etc., in flour. P. Halton and E. A. Fisher 284
Effect on the oxygen absorption of ether extracted and unextracted flours. P. Halton and E. A. Fisher..... 281
Molds, growth of, as influenced by acids and acid conditions. George W. Kirby, Lawrence Atkin, and Charles N. Frey..... 865
Monocalcium phosphate
Methods for determining the neutralizing value of. S. Klosky, K. H. Lorenz, and W. Corey..... 687
Neutralizing value of. C. S. King..... 540
Mottram, J. C., and N. Palmer. On the factors determining rickets in rats fed on cereal diets..... 682
Munz, Emil, and C. H. Bailey
Effect of the enzymes of malted wheat flour upon certain properties of flour and dough..... 443
Refractometric methods of determining the diastatic activity of flour..... 85
Nitrogen, effect of, on character of bread doughs after mixing for various time intervals. J. C. Baker and M. D. Mize..... 723
Nutritional properties of wheat. D. Breese Jones..... 771
On the changes of leucosin, gliadin, and glutenin under the action of flour and yeast proteinases. A. V. Blagoveschenski and M. P. Yurgenson..... 103
On the factors determining rickets in rats fed on cereal diets. J. C. Mottram and N. Palmer..... 682
Oxygen
Absorption of, by flour during storage; factors limiting. P. Halton and E. A. Fisher.....267, 285
Effect on character of bread and bread doughs after mixing for various time intervals. J. C. Baker and M. D. Mize.....723, 725, 727
Palmer, N., and J. C. Mottram. On the factors determining rickets in rats fed on cereal diets..... 682
Papain, action of, on dough characteristics. Emil Munz and C. H. Bailey..... 452
See also Eldor Rupp and C. H. Bailey..... 499
Parker, H. K. Report of the Auditing Committee..... 444
Pepsin, action of, on dough. Eldor Rupp and C. H. Bailey..... 505
Photomicrographs of butter, sugar, and egg emulsions. Emily Grewe..... 806, 807
Potassium bromate
Effect of various amounts of, on water soluble nitrogen of flour. J. W. Read and L. W. Haas..... 753
Effect on enzyme activity..... 752
